ABOUT THE VINEYARD:

Selection of vineyards 5 days before the harvest, more than 30 years old on clay-calcareous soils.

Yields of no more than 5,000kg/ha, due to the pruning and espesgura work carried out during the winter and spring. With a rinse of grapes before veraison.

MICROVINIFICATION:

Destemmed without crushing, fermentation in 15 days at low temperature and macerated for 20 days with a flooded hat, successive pump-overs and delestage. Gentle pressing in a pneumatic press.

It is not clarified, it is bottled after a very gentle filtering so that the wine does not lose its properties.

STORING:

18 months, 80% American oak and 20% French oak from 1 to 5 years with two rackings before bottling. It remains in the bottle for a minimum of 6 months before going on the market.

VINTAGE PRODUCTION: 28.852 botellas de 0,75 y 1.512 magnum
